	06	Visual routing map and a script to list all routes for a Django project
20251003	00	What is restful API(Representational State Transfer API) in web design
	01	What is carousel/slider in web design
	02	Project scaffolding or codebase cloning approaches to start new project
	03	What is ORM (Object-Relational Mapping) in computing
	04	You can create as many Django projects as you want on a computer
	05	‘pyenv’, ‘virtual environment’ and ‘database’
	06	What is venv
	07	“One venv for ten projects” vs “One venv per each of the ten projects”
	08	Procedures to reuse an old project to build a new one
	09	Explanation to: ‘workon’, ‘code .’, ‘python manage.py makemigrations’, ‘python manage.py migrate’
	10	What is the role of the ‘pages’ app
	11	What is the Django admin interface
	12	What is path() in Django
20251006	00	What are Q Objects in Django
	01	Main types of objects in Django: model objects, queryset and Q objects, form objects, view objects, URLconf objects, template objects, middleware objects, signal objects, field objects
	02	A Django ORM query

Index_Q to Als_20250917-1031

	03	What are django.db, models and str
	04	What are models, Model, CharField
	05	Why we use = instead of == inside the Q() object
	06	What is the exact meaning of {% url 'pages:index' %}
	07	What are {% static 'img/about.jpg' %} and {% load static %}
	08	A Django template expression embedded inside an HTML tag
20251008	00	Deployment plan for a Django project
	01	What is Django-taggit
	02	Create three new Django databases in one new app
	03	Create three new Django databases in one new app
	04	What does 'listings.apps.ListingsConfig' mean
20251009	00	What is actions = ['clear_records', 'format_records', 'export_records', 'import_records']
20251014	00	Things to do after cloning a new project named studenthostel by this command: cp -r ERB7 studenthostel.
	01	Do ERB7 and StudentHostel have separate Django projects and separate built-in Django admin apps
	02	What to do with manage.py & how it fits into studenthostel project
	03	Do you have to rename the config folder
	04	Do you need a new virtual environment for studenthostel
	05	Should you create the virtual environment first
	06	Errors since virtual environment not activated or Django not installed
	07	Pros and cons if two projects use the same virtual environment
20251016	00	Steps to create the 'hostel' database in pgAdmin 4
	01	Make use of clinic database to create hostel database
	02	Add CRUD operations (create, read, update, delete) to hostel database
	03	How to Run CREATE DATABASE hostel WITH TEMPLATE clinic OWNER desmondho; in pgAdmin's Query Tool
20251017	10	Steps to do the assignment
20251017a	00	Steps to do the assignment
	01	Warning message after executing "CREATE DATABASE hostel WITH TEMPLATE clinic OWNER postgres;"
	02	Error message: source database "clinic" is being accessed by other users There is 1 other session using the database
	03	How to locate "Dashboard > Activity > Sessions" in pgAdmin
	04	Steps to create a new repository named hostel in GitHub
	05	Errors after creating a new remote repository called hostel in GitHub
	06	What is the command to upload local repository to remote repository
	07	Use "git push" to push future changes from local to GitHub for hostel
	08	Command: git push -u origin main:new
	09	What I should do next time to avoid two branches in a GitHub repository where it should have only one branch per original design
	10	Steps to do the assignment
20251021	00	What is MESSAGE TAGS in Django

Index_Q to Als_20250917-1031

	01	“Where journeys begin, and memories stay.” 「旅程從這裡開始，回憶永遠留在心中。」
	02	Paragraphs introducing LI JING Hostel to customers
