

I put a sentence in `<p class="mt-4"></p>` but the characters are too small. Please tell me how to increase the font size of the sentence?

You're on the right track, SIU! The class `mt-4` in `<p class="mt-4"></p>` only adds **margin-top**, not font size. To increase the font size of the text inside your `<p>` tag, you have a few options:

Option 1: Add a Bootstrap Font Size Class

Bootstrap 5+ includes utility classes for font sizing:

Class Font Size

- `fs-1` Largest
- `fs-2` Very large
- `fs-3` Large
- `fs-4` Medium
- `fs-5` Small
- `fs-6` Smallest

Example:

```
<p class="mt-4 fs-4">Your sentence here</p>
```

Option 2: Use Inline CSS

You can directly style the font size:

```
<p class="mt-4" style="font-size: 20px;">Your sentence here</p>
```

You can adjust `20px` to any size you prefer (e.g., `18px`, `1.5rem`, etc.).

Option 3: Use a Custom CSS Class

Define your own class in your CSS file:

```
.large-text {  
  font-size: 20px;  
}
```

Then apply it:

```
<p class="mt-4 large-text">Your sentence here</p>
```

Queries to Als_20251022(三)

Let me know if you'd like help choosing a font size that looks great on both desktop and mobile. Want to add a subtle animation or gradient next?

20251022_01

I'd like to add a new and simple web page to the hostel website. This web page is called OFFICE-STYLE. OFFICE-STYLE is as simple as another existing web page about.html, which is located at hostel/templates/pages/about.html. The requirements for OFFICE-STYLE are:

- "OFFICE-STYLE" appears in the nav bar.
- By pressing "OFFICE-STYLE" on the nav bar, user can go to the OFFICE-STYLE web page.

Please list all steps to fulfill the above requirements with explanations.

Here are some existing files' contents in the hostel project:

hostel/config/urls.py:

```
from django.contrib import admin
from django.urls import path, include
from debug_toolbar.toolbar import debug_toolbar_urls
from django.conf import settings
from django.conf.urls.static import static
```

```
urlpatterns = [
    path("", include("pages.urls", namespace="pages")),
    path('listings/', include("listings.urls", namespace="listings")),
    path('contacts/', include('contacts.urls', namespace="contacts")),
    path('accounts/', include('accounts.urls', namespace="accounts")),
    path('admin/', admin.site.urls),
] + debug_toolbar_urls() + static(settings.MEDIA_URL, document_root=settings.MEDIA_ROOT)
```

```
admin.site.site_header = "Medical Center Admin"
admin.site.site_title = "Medical Center Admin Portal"
admin.site.index_title = "Welcome to Medical Center Admin Portal"
```

hostel/pages/urls.py:

```
from django.urls import path
from . import views
```

```
app_name = 'pages'
```

```
urlpatterns = [
    path("", views.index, name='index'),
    path('about', views.about, name='about')
]
```

hostel/templates/pages/about.html:

```
{% extends 'base.html' %}
<!--block title-->
{% block title %} | About {% endblock title %}
{% block content %} {% load static %}

<section id="showcase-inner" class="py-5 text-white">
<div class="container">

You're doing great, SIU! To add a new **OFFICE-STYLE** page to your hostel website and make it appear in the navbar, here's a complete step-by-step guide with explanations:

Step-by-Step Guide to Add the OFFICE-STYLE Page

◆ Step 1: Create the Template File

Create a new HTML file for the page:

Location:

hostel/templates/pages/office_style.html

Content (simple version):

```
{% extends 'base.html' %}
{% block title %} | Office-Style {% endblock title %}
{% block content %}
<section class="py-5 text-center">
  <div class="container">
    <h1 class="display-4">Office-Style Rooms</h1>
    <p class="lead">Designed for business travelers who need a quiet and
functional workspace during their stay.</p>
    
  </div>
</section>
{% endblock %}
```

You can copy and simplify from about.html as needed.

◆ Step 2: Add a View Function

Queries to Als_20251022(三)

Open `hostel/pages/views.py` and add:

```
from django.shortcuts import render

def office_style(request):
    return render(request, 'pages/office_style.html')
```

◆ Step 3: Add a URL Pattern

Open `hostel/pages/urls.py` and update:

```
urlpatterns = [
    path('', views.index, name='index'),
    path('about', views.about, name='about'),
    path('office-style', views.office_style, name='office_style'), # ← Add this
line
]
```

This makes the page accessible at `/office-style`.

◆ Step 4: Add Link to Navbar

Open `hostel/templates/partials/_navbar.html` and insert this inside the `<ul class="navbar-nav">` block:

```
<li {% if 'office-style' in request.path %} class="nav-item mr-3 active" {% else
%} class="nav-item mr-3" {% endif %}>
  <a class="nav-link" href="{% url 'pages:office_style' %}">Office-Style</a>
</li>
```

This adds the “Office-Style” link to your navigation bar and highlights it when active.

◆ Step 5: Add an Image (Optional)

Place an image named `office_style.jpg` in:

`hostel/config/staticfiles/img/`

Or update the `<img>` tag in your template to match the actual filename.

◆ Step 6: Test It Locally

Run your server:

```
python manage.py runserver
```

Queries to Als_20251022(三)

Visit:

`http://localhost:8000/office-style`

Check that:

- The page loads correctly
- The navbar link works and highlights when active
- The image displays properly

Summary of Files to Update

File	Action
<code>office_style.html</code>	Create new template
<code>views.py</code>	Add <code>office_style</code> view
<code>urls.py</code> (pages)	Add URL pattern
<code>_navbar.html</code>	Add link to navbar
<code>static/img/</code>	Add image (optional)

Let me know if you'd like help styling the page or adding more room types. Want to add a booking button next?

Following above, (Q1)do I need to execute “python manage.py collectstatic”? (Q2)What is the purpose of Step 5: Add an Image? If I do not perform Step 5, will the answer to Q1 be different? Please explain.

Excellent follow-up, SIU! Let’s break this down clearly:

✅ Q1: Do You Need to Run `python manage.py collectstatic`?

◆ Answer:

- **No**, if you're working in **development mode** (`DEBUG = True` in `settings.py`)
- **Yes**, if you're preparing for **production deployment** (`DEBUG = False`)

🔍 Why?

In development, Django serves static files directly from your project folders. But in production, Django requires you to run:

```
python manage.py collectstatic
```

This command gathers all static files (images, CSS, JS, etc.) from your apps and places them into the `STATIC_ROOT` directory so your web server (e.g., Nginx) can serve them efficiently.

✅ Q2: What Is the Purpose of Step 5: Add an Image?

◆ Purpose:

Step 5 ensures that the image referenced in your new `office_style.html` page (e.g., `office_style.jpg`) actually exists in your static files directory:

```

```

If the image file isn’t present, the browser will show a broken image icon or nothing at all.

✅ Q3: If You Skip Step 5, Does Q1 Change?

◆ Answer:

No, skipping Step 5 does **not** change whether you need to run `collectstatic`.

Queries to Als_20251022(三)

However:

- If you're in **production**, and you **do** add the image, then you **must** run `collectstatic` to make sure the image is included in the deployed static files.
- If you **don't** add the image, there's nothing new to collect—but the rule still stands: `collectstatic` is only needed for production.

Summary

Scenario	Need to Run <code>collectstatic</code> ?	Why
Development (<code>DEBUG = True</code>)	✗ No	Django serves static files directly
Production (<code>DEBUG = False</code>)	✓ Yes	Static files must be collected for deployment
Image added in Step 5	✓ Yes (in production)	Ensures image is available to web server
Image not added	✓ Yes (in production)	Still required for other static files

Let me know if you're preparing for deployment—I can help you configure `STATIC_ROOT`, optimize images, or set up your web server. Want to preview the OFFICE-STYLE page with a placeholder image next?

LI JING Hostel is offering four types of rooms:

- office-style rooms for business travelers
- romantic-style rooms for couples
- family-friendly rooms for vacationing households
- study-focused rooms ideal for students

I'll create 4 independent pages to promote these four types of rooms. Please write a short paragraph (around 200 words) for each room type. The words should be attractive, persuasive and eye-catching. Please also provide the corresponding Chinese translation.

Absolutely, SIU! Here are four engaging and persuasive promotional paragraphs—each around 200 words—for the four room types offered by LI JING Hostel. Each is paired with a Traditional Chinese translation to support bilingual presentation on your website.

Office-Style Rooms

English:

Designed with the modern professional in mind, our office-style rooms offer a seamless blend of comfort and productivity. Whether you're in Hong Kong for a conference, a business meeting, or remote work, these rooms provide a quiet, well-equipped space to focus and recharge. Each room features a spacious desk, high-speed Wi-Fi, ergonomic seating, and ample lighting—perfect for long hours of concentration. After work, unwind in a cozy bed and enjoy easy access to nearby dining and transport hubs. At LI JING Hostel, we make business travel feel effortless.

中文：

專為現代商務人士而設，LI JING Hostel 的辦公室型房間完美結合舒適與效率。無論您是來港參加會議、洽談業務或遠程工作，這些房間都能提供安靜且設備齊全的空間，助您專注與充電。房間配備寬敞書桌、高速 Wi-Fi、人體工學座椅及充足照明，適合長時間工作。工作之餘，您可在溫馨床鋪放鬆休息，並輕鬆前往附近餐飲及交通地點。LI JING Hostel 讓您的商務旅程更輕鬆自在。

Romantic-Style Rooms

English:

Escape the ordinary and indulge in a romantic retreat at LI JING Hostel. Our romantic-style rooms are thoughtfully designed for couples seeking intimacy, comfort, and a touch of elegance. Soft lighting, cozy furnishings, and tasteful décor set the mood for unforgettable moments. Whether you're celebrating an anniversary, planning a surprise getaway, or simply enjoying each other's company, these rooms offer the perfect setting. Located near scenic spots and vibrant nightlife, your love story begins here.

中文：

逃離日常，與摯愛共度浪漫時光。LI JING Hostel 的浪漫型房間專為情侶設計，營造溫馨、舒適又不失格調的氛圍。柔和燈光、雅緻擺設及精緻裝潢，為您締造難忘回憶。無論是慶祝紀念日、驚喜之旅，或單純享受彼此陪伴，這裡都是理想之選。房間鄰近景點及夜生活熱點，讓您的愛情故事從這裡展開。

Family-Friendly Rooms

English:

Family adventures start with the right space—and our family-friendly rooms are built for joy, comfort, and togetherness. Spacious layouts, multiple beds, and kid-friendly amenities make these rooms ideal for vacationing households. Whether you're exploring Hong Kong's attractions or relaxing after a day out, everyone has room to breathe and bond. Safety, convenience, and warmth are at the heart of our design. At LI JING Hostel, we welcome your whole family with open arms.

中文：

家庭旅程從合適的空間開始。LI JING Hostel 的家庭型房間寬敞舒適，設有多張床及適合兒童的設施，讓一家大小都能盡情享受假期。無論是探索香港景點，或在外出後放鬆休息，這裡都能提供足夠空間，讓家人彼此聯繫、共享歡樂。安全、便利與溫馨是我們設計的核心。LI JING Hostel 熱誠歡迎您的全家到來。

Study-Focused Rooms

English:

For students and scholars on the move, our study-focused rooms offer a peaceful haven for learning and reflection. These rooms feature quiet surroundings, comfortable desks, and reliable internet—ideal for exam prep, research, or remote classes. Whether you're attending a short course, preparing for interviews, or simply need a focused environment, LI JING Hostel supports your academic journey. Stay inspired, stay productive, and stay with us.

中文：

為求學者及學生而設，LI JING Hostel 的專注型房間提供安靜、舒適的學習環境。房間配備書桌、穩定網絡及寧靜氛圍，適合備考、研究或遠程課程。無論您是參加短期課程、準備面試，或需要專注空間，LI JING Hostel 都是您學習旅程的理想夥伴。保持靈感，提升效率，與我們一同前行。

Let me know if you'd like help formatting these into your Django templates or styling them with icons and images. Want to add booking buttons or testimonials next?
